Preface

Children are a great blessing bestowed on us by God. It is termed as one of the nine assets (नौ निधि). The family is ordained of God and is central to HIS plan for HIS eternal presence. This divine plan makes it possible for individuals to feel HIS presence and keep the family united.

The role of children in the family has changed dramatically in the last 100 years. Families needed children for their livelihood. When we were agriculture community children were needed to assist the family in daily chorus. Children had a sense of being vital part of the survival of their family.

In the present automated world children have a sense of self - worth?

This way we have now had a situation to deal with the change from nature to nurture. We have to nurture our children for this changed world. We all expect our children to be able to face the challenges of modern world. This has made the parents to know more about the future of their children. Earlier days families had many children to assist them and be helpful in their old age. Now it has changed. We want smaller family and expect our children to progress in life. The children are becoming more independent and conscious about their worth. Sense of competition is the driving force.

We also have noticed that children are not worried about their parents. It is not so always but parents now want to know about the treatment they will receive from their children.

These thoughts are the motive behind this book. We have dealt with these queries in this book.

I am thankful to Mr. Narender Sagar for his prodding to write this book and the pains taken by him in publishing the book.

The parameters are,

3. Karaka of fifth house Jupiter

Fifth house

The fifth house should promise birth of children in the horoscope. It is the primary house and the house indicates the fulfillment of promise. To grant the promise any house should be strong. For a house to be strong any of the following condition should be met;

a. Lord of house is placed in the house or aspects the house.

b. Lord of lagan is placed in the house or aspects the house.

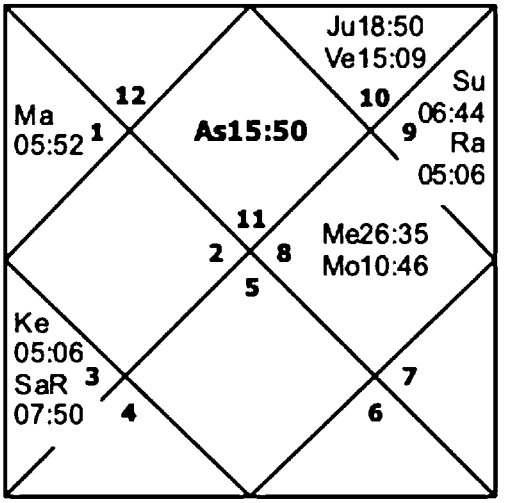

c. Karaka of the house is placed in the house or aspects the house.

d. The house is occupied or aspected by benefics.

e. When the house is not occupied or aspected by any planet it can still promise the results.

Note; For the purpose of this assessment, the lord of lagan and the lord of house are always benefic. The natural benefics are Jupiter, Venus, Mercury and Moon. A debilitated planet also promises the fructification of house.

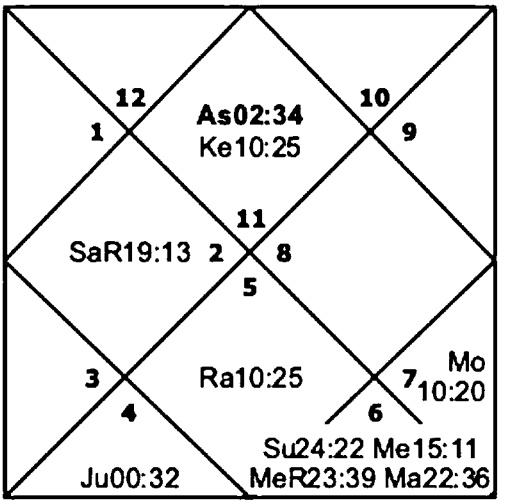

Example –1. DOB 22 December 1973, TOB 11.20, POB Delhi.

BEEJA SPHUTA AND KSHETRA SPHUTA

Beeja Sphuta (BS) and Kshetra Sphuta (KS) are mathematically derived points for a horoscope. BS is worked out for a male horoscope and KS for a female horoscope. Beeja means seed and Kshetra means field. This point indicates the capability to produce a child and the worthiness of children.

Beeja Sphuta is the sum of the longitude of Jupiter, Venus and Sun. The longitudes are taken from first point of Aries. The BS should be in an odd sign in Rashi chart, navamsha and saptamsha charts to promise progeny. We examine the BS and its lord in all three charts.

Kshetra Sphuta is the sum of the longitudes of Jupiter, Mars and Moon in female chart. The KS and its lord should occupy even sign in Rashi chart, navamsha and saptamsha chart.

The lagan lord, fifth lord of birth chart and Jupiter are seen in the saptamsha for their placement, conjunction and aspect received by them.

The lord of BS or KS in saptamsha chart is seen for luxuries. It should have good relation with Lagan lord and fifth lord of birth chart in saptamsha and well placed in D7 to grant a luxurious life.

If it is in 6,8,12 from birth Lagan lord it gives physical problems, when it is in 6,8,12 from fifth lord of birth chart then problems due to poorva punya.

The placement of BS or KS is checked in dreshkana also to see the capability of getting progeny.

SANTANA TITHI

Jatakdesamarga gives concept of Santana tithi for assessing the possibility of child birth and the problems which can be faced by a person in this regard. A step by step method of calculation is given to work out Santana tithi for a horoscope.

1. Subtract the longitude of Sun from that of Moon.
2. Multiply the difference by 5.
3. Expunge multiples of 360 from the product till the remainder is 360 or less than 360.
4. Find out the paksha and tithi from this remainder.

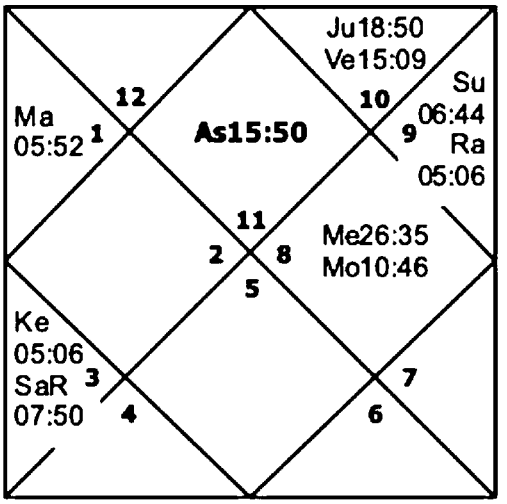

Rules for examination of Santana tithi are given.

1. When the paksha is Shukla paksha (SP) there will be progeny.
2. If the paksha is Krishna paksha (KP) there will be difficulty in getting progeny.
3. For tithi prior to sixth in SP there will be progeny but slowly and gradually.
4. For tithi after tenth of SP it will be quick.
5. If tithi is prior to sixth in KP there will be progeny after worshiping GOD Subramanian.
6. For four tithi from seventh in KP he may have progeny after second marriage and by feeding Brahmins.
7. For eleventh and twelfth tithi of KP there may be conception but no issue is possible.
8. For thirteenth and fourteenth tithi of KP he should adopt a child.
9. If it is amavasya even adoption is not possible.
10. The Rikta tithi of both paksha are not conducive of any auspicious results.

Note: - The tithi and Sphuta should be seen together for assessing possibility of having progeny.

Chapter 2

Saptamsha

Saptamsha is the seventh division of the horoscope. It highlights the fifth house affairs of the horoscope. It underlines the affairs of seventh house and the marital activity which results in procreation.

The saptamsha chart is seen for Poornata (complete fulfillment). Luck factor from past life (Poorvajanam Punya) and its impact on this life, children and grand children, Mantra Siddhi, speculation, students and disciples, prosperity of spouse, creativity and the realization of results. This chart shows the future generations.

Each Sign is divided into seven equal parts called saptamsha. Each saptamsha measures 4°17'8.57" (4 degrees, 17 minutes 8.57 seconds)

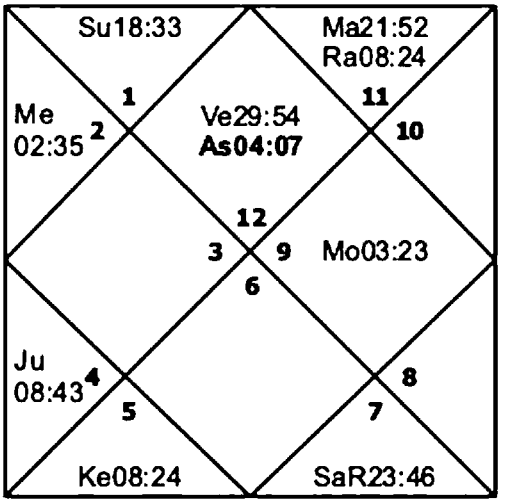

For a planet in odd sign in the birth chart, the first saptamsha remains in the same sign. The next saptamsha goes to the next sign in direct order in D7 chart. For an even sign the planet placed in first saptamsha goes to the seventh sign from the sign occupied by it in D1. The second saptamsha goes to the next sign to seventh in direct order and so on. This method of casting D7 chart is the Parashar method and is followed commonly. This is a cyclical chart.

Promise of child birth

First we mention the combinations given in classics regarding birth of children, their well being or otherwise.

BPHS

1. The lagan lord and the fifth lord placed in fifth house or in Kendra or in trines, the person will be happy through sons. When fifth lord is in trik

houses the person will suffer through lack of son. When the fifth lord is combust, is in conjunction with a malefic planet and is weak, no son will be born or if born his death is certain.

Phaldeepika

A person will be blessed with children if;

1. Jupiter and fifth lord from lagan and Moon are well placed and fifth house has the aspect of a benefic planet or a planet which is lord auspicious house (other than trik house).
2. Lagan lord and fifth lord are together or have mutual aspect or have exchanged sign.

Simple approach

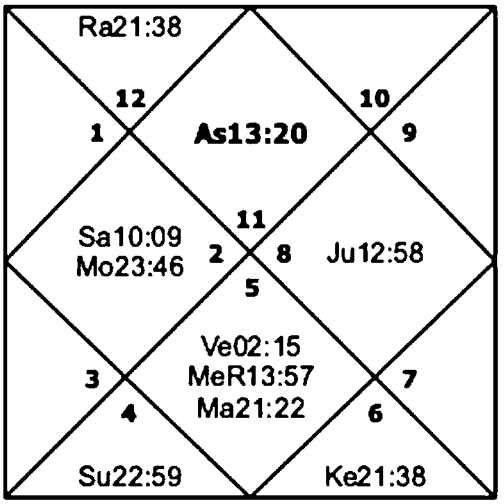

The saptamsha chart has the final say in the matters regarding children of a person. It provides all information about children. Saptamsha can be treated as an independent horoscope. A simple approach to see the promise of having children in saptamsha is given.

1. The lagan is the desire of a person to have children or not. It also shows his or her attitude towards children. Benefic association with lagan is a positive indication. Malefic association is a negative indication.
2. The lagan lord indicates efforts or the way by which children are born. Malefic association indicates problems or extra efforts required to get children.
3. When lagan or lagan lord is not associated or aspected by any planet even then the promise is present.
4. Dasha is very important factor to time any event. We are checking the promise of child in a

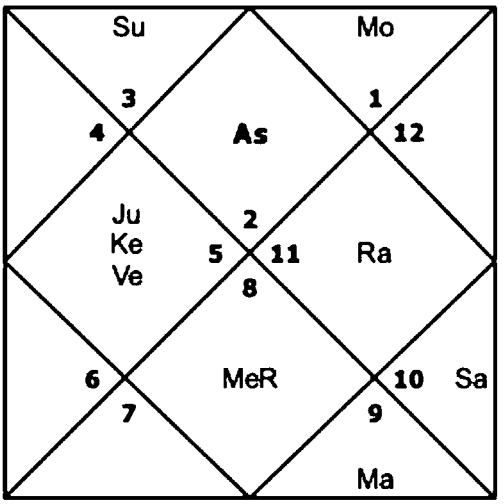

horoscope using saptamsha. The role of Dasha is not discussed here.

We will examine few horoscopes to show the application of this simple rule for having children, having children after delay or efforts and denial of children.

Delay in child birth

Phaldeepika lists few combinations for delay in child birth.

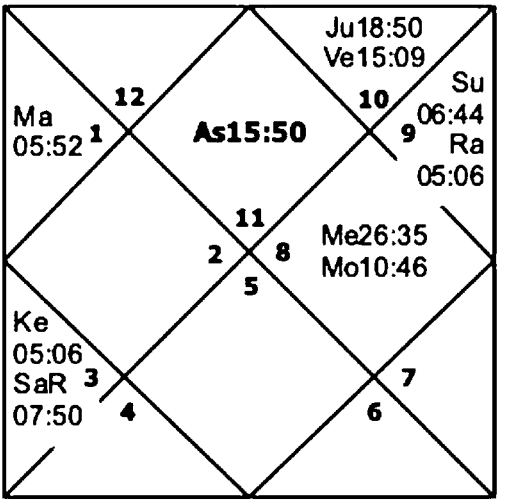

1. When Sun is in fifth house in a barren sign and Mars and Saturn are in lagan and eighth house respectively.
2. When a barren sign is in fifth house and Saturn, Jupiter and Mars are in lagan, eighth and twelfth house respectively.

3. When Moon is in eleventh house and a malefic in fifth house from Jupiter and several planets occupy lagan.

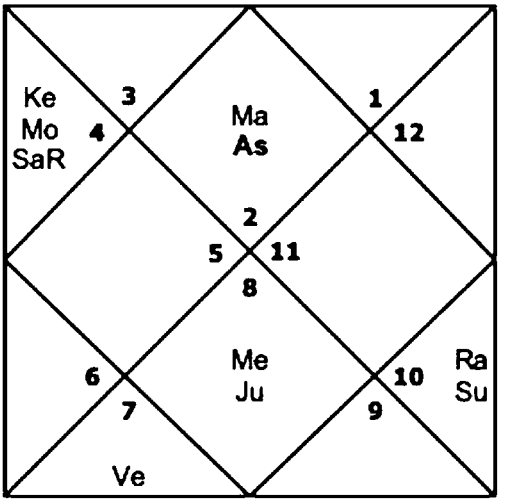

We give a **simple approach** to check delay in child birth.

1. The lagan of saptamsha promises child.
2. Saturn is the cause of delay. Saptamsha is the chart that indicates birth of children. Delay in child birth is caused by association of Saturn with lagan, fifth house and ninth house or with their lords in saptamsha. Benefic association gives short delay. Malefic association gives longer delay.

Chapter 3

Luxury

Beeja Sphuta and Kshetra Sphuta are mathematically derived points in the birth horoscope. These are treated as planet and this is placed in birth and divisional charts. The computation of these is given in the chapter of birth horoscope.

BS and KS are important as they have a wide application astrologically in understanding many issues regarding children and the life of individuals.

Classics: - Birth of children

Classics have given use of BS and KS to check the promise of child birth in a horoscope.

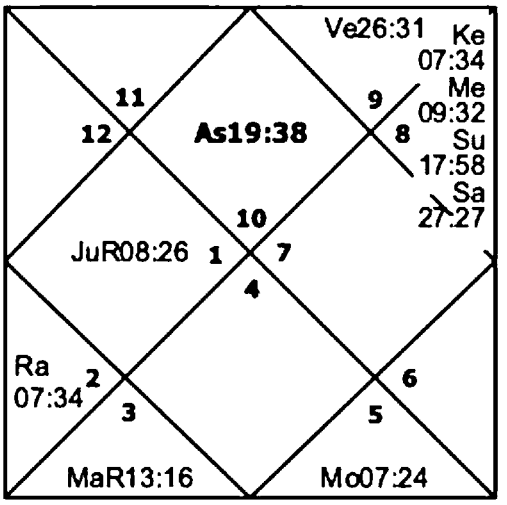

1. BS should occupy an odd sign in birth horoscope, navamsha and saptamsha to promise child birth.
2. KS should occupy an even sign in birth horoscope, navamsha and saptamsha to promise child birth.

It may happen that BS is not in odd sign in all three varga. Same way KS may not be in even sign in all three varga. It is good to study BS and KS like any other planet. The placement and association of Sphuta and its lord is checked in all three varga. They should not be in trik houses or have malefic association and aspect. Association with benefics will promise progeny.

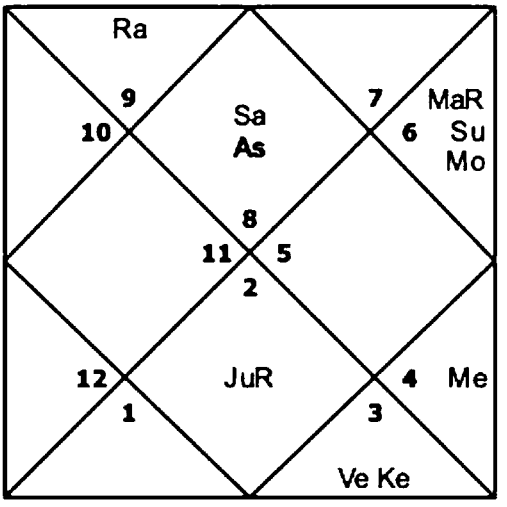

We take two charts to see the application.

Chapter 4

Renanubandhan

An excellent and simple explanation of karma theory and renanubandhan written by Sri Sri Ravishankar Ji is reproduced here.

As I grew up I started wondering about the purpose of life. Life brought with its myriad experiences, the inevitable experience of suffering too. Why do we suffer? Why are we born? Such questions plagued my mind for a long time. The sacred books and the wise men gave me a glimpse of the theory of karma and transmigration of the soul. It seemed very logical, yet I could not accept it fully till I started studying Jyotish or Hindu Astrology. It took me years of hard work, some experience and sincere thinking to appreciate the subtleties. When I started seeing the patterns in the horoscope manifesting in actual life, I had to accept the theory of Karma. Slowly it was no more a belief, but a truth. Karma means not only action, but also the result of an action. Whatever we are going through at the moment is the result of previous actions, not just of this life, but many lives. In short Karma is the sum total of our actions both in this life and in the preceding ones. Nothing happens by accident or chance actions. Everything happens in regular order, the past, present and the future being interconnected and interdependent. Cause is Effect concealed, and Effect is Cause revealed!

Now that brings us to the question of rebirth. Books written by Ian Stevenson, Hiroshi Motoyama, Raymond

Moody and many other interesting cases suggest that there is compelling evidence for rebirth. Every good astrologer himself is proof of Karma and rebirth!

Let us examine the theory of Karma and rebirth according to Santana Dharma. You will not cease to exist after death. It is the physical body that dies. The astral body (sukshma or linga sarira) and causal body (Karana sarira) continue forth. The causal body has all your Karmas stored in it as seeds, seeds that result in rebirth. As long as man has not exhausted all his Karmas, he has to be born again. All our actions and thoughts become the seeds for our future lives. Karma is at the root of this cycle of births and deaths. Again and again Karma makes us take birth. Countless times have we been born and countless times have we died. Very many wombs have we passed through. This is the Hindu view. The Buddhist view is different in its approach to reincarnation and the self though it shares a lot with the Hindu view as far as Karma is concerned.

Renanubandhan

In each life, we have mother, father, brothers, sisters, spouse, children and so on. We are born in a family as a result of un discharged debts of past lives. Constantly we are creating accounts, debiting and crediting. We are creating Karmic debts with all those with whom we interact. The Karmic debts (rna) lead to bondage or attachment (bandhan). These Karmic attachments pull us into the wheel of existence again and again. Renanubandhan (the bond that results from Karmic debts) is at the root of repeated lives.

Karma leads to rna and rna leads to Karma. It works both ways. If you have given something to somebody in some life, the memory is stored in your causal body. That person will be your debtor in this birth. If you have

taken in the past, it will be taken from you in some birth. If you have given in the past it will come back to you later. The causal body stores the memory of all of one's renanubandhan of countless births. Till all the karma stored in the causal body is burnt away or exhausted, there is no liberation from rebirth. Human life is nothing but a memory of renanubandhan, the story of the countless karma that we make, and live through. Every relationship reflects some renanubandhan. The people with whom we have very strong renanubandhan become our parents, spouse, children and co-born in this life. In most relationships it is our rna that ensures a complementary fit, just like a lock and key.

The citta (unconscious mind) holds these emotional memories or subliminal impressions that drive one to act or seek. They are more like vague impressions rather than clear memories. The memory of Karmic debts may be sweet or bitter. Sweet memories of karmic debts lead to a 'happy' relationship and bitter memories to an 'unhappy' relationship. In reality most of the karmic debts are mixed, a mixture of sweet and bitter memories. That is why most relationships are of a mixed nature. I will try to explain briefly two kinds of relationships that are most significant: parent/child and love/marriage relationships.

Parent /Child Relationship

This relationship is the most important. This is the easiest way to discharge our karmic debts toward one another. Some possible ways in which it works:

- A person whom you have helped in some life is born as a child, takes good care of you in the present life and discharges his/her debt.
- A person to whom you owe a lot in some life may be born as your son or daughter and take back what

you owe. Such a child makes you spend heavily on her/him.

- A person whom you cheated ruthlessly in a previous life is born as your child and gives you a lot of suffering, takes your money and goes away.
- An enemy of some life is born as a son/daughter in this life, in which case, he/she behaves like an enemy, hates you and causes a lot of suffering to you. The spouse, the parents, siblings, friends, servants, all are born in a particular place-time together as a result of renanubandhan.

Astrological combinations

Astrology is a language which can be read after learning it. It indicates the writing of karma written in your book. The birth horoscope is the basic book and saptamsha is the chapter dealing with your karma regarding children. Some combinations from classics are given which deals with inimical relations between parent and child.

BPHS

1. Relation of lagan lord and sixth lord with ninth cause enmity between father and son.

JATAKA TATVA

1. When fifth lord is in twelfth or sixth house child behaves like enemy.
2. If lagan lord and Jupiter are enemy or bitter enemy according to Panchdha Maitri and such Jupiter is placed in sixth house from lagan and is aspected by lagan lord the child and father behave as enemy.

3. When there is a malefic in fifth house from Jupiter the happiness from son is not there. This can be denial of a son.

PHALDIPIKA

1. When Sun is in ninth or twelfth house from lagan the son is an enemy.

   According to classics the relation between child and father is decided by lagan/ lagan lord, fifth/ fifth lord and ninth/ ninth lord. Relation of these houses and their lords with trik or trishadaya houses and lords cause enmity. More malefic relations will give more bitterness.

Chapter 5

Worthy Children

Children are one of the naunidhi (nine great wealth). To have good children is a boon granted to a person by God. Astrologically we can evaluate the children from the following factors. These are checked in saptamsha.

1. Lagan lord

Lagan lord of saptamsha is the manager of saptamsha. When it is strong and is holding a position of status then the management is sound. The lagan lord should be exalted, placed in own sign, occupy Kendra or trikona or related to benefics. This provides a good foundation for bringing up children. Its association with malefic or placement in trik houses is not welcome.

A strong lagan lord indicates the progress of children in the field of work of parent.

2. Raj Yoga

Presence of raj yoga elevates the saptamsha. The raj yoga is checked from lagan or from a specific house. All children of a person cannot be worthy or achieve greatness in life. We can see the formation of raj yoga for a specific child. A particular house represents a child. For odd lagan in saptamsha the first child is seen from fifth house. For an even lagan the first child is seen from ninth house. Other children are seen in order.

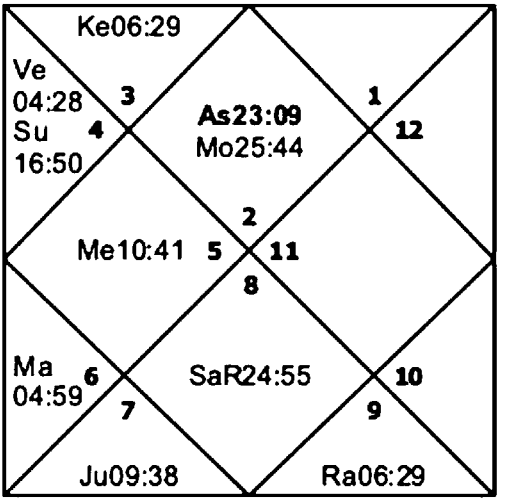

3. Karaka Jupiter

Next to check is the condition of Jupiter in saptamsha. A benefic Jupiter assures a good child who takes care of parents and has good virtues. This also can be checked for specific child in similar way as seen for raj yoga. Among many children some child may not have good nature.

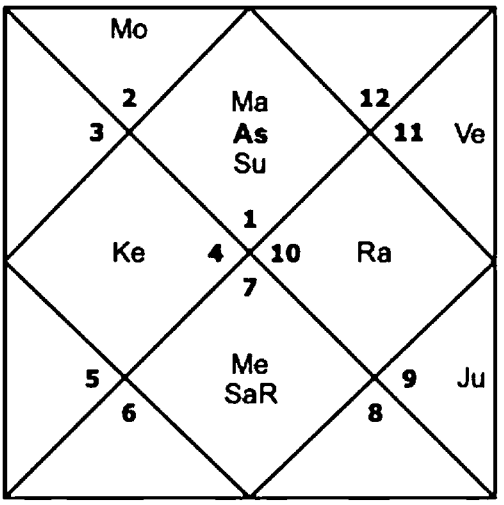

4. Sphuta

The placement and association of Beeja and Kshetra Sphuta and their lords is now checked in saptamsha. A Kendra or trikona placement assures a good life for person and children. This also can be checked for a particular child.

Chapter 6

Child by Adoption

In the present times modern medical processes use artificial insemination and have become a practice for childless couples. Life is full of tension for ladies also because they are working women and do not get relaxed home life. Sometimes even with these painful process women do not become mother.

Saravali lays down twelve types of children. These are;

1. **Legitimate child** – child born of wedded wife. If the fifth house counted from lagan or Moon has at least one division of Jupiter in various varga calculations or has a benefic sign or aspected by a benefic the person will have legitimate child.
2. **Chhaitraj** – child obtained from own wife by authorizing a kinsman to raise the same for him. When fifth house falls in the varga of Saturn and aspected by Mercury but without the aspect of Jupiter, Mars or Sun. Similar is the result if fifth house has sign of Mercury with Mercury placed there in aspect to Saturn but without the aspect of Jupiter, Mars or Sun.
3. **Adopted or purchased** – when fifth house belongs to Saturn and is occupied by Saturn with aspect of Moon. Same is the case when Mercury occupy fifth house in a sign belonging to himself and under aspect of Moon.

4. **Kritima** – Adopting a grown up child without the consent of his parents. When the fifth house is occupied by Saturn and is not aspected by any planet and occupies saptamsha of Mars.

5. **Base and foolish** – when fifth house is occupied by Sun and falls in varga of Saturn receiving aspect of Mars the child will be extremely poor. When Moon occupies fifth house with only aspect of Saturn and falls in navamsha of Mars then the child will be base and foolish.

6. **Apavidhha** – when a child is disowned by his parents and is adopted by a stranger is called an apaviddha child. This happens when fifth house is occupied by Mars under aspect of Sun and falls in varga of Saturn.

7. **Punarbhoo** – a child born to a widow given to a person in marriage. When Moon and Saturn are in fifth house under aspect of Sun and Venus and fifth house fall in varga of Saturn.

8. **Kanin** – A child born to an unmarried girl. When Moon is in fifth house with Sun or aspected by Sun and fall in Cancer Dwadamsha person gets progeny through an unmarried girl.

9. **Sahode** – child born of a woman pregnant at the time of marriage. When fifth house is in varga of luminaries and contains Sun and Moon in aspect of Venus only. (Venus cannot aspect Sun. it can be conjunct only.)

10. **Dashi child** – Child born through a female slave or servant for a person. When fifth house is in navamsha of Venus and is aspected by Venus only the progeny will be through servant. Similar will be the result when Venus is replaced by Moon.

Phaldeepika gives following combinations when a person adopts a child;

1. The sign falling in fifth house is Gemini, Virgo, Capricorn or Aquarius. This is aspected or occupied by Saturn.
2. Fifth lord is weak and not related to lagan, lagan lord and fifth house/ lord.

Astrology can foretell about child birth. It is good to advice to adopt a child rather undergo fruitless painful procedures. Some other rules for adoption of child are given. These are taken from **classics.**

1. Lord of fifth house is in barren sign. Barren signs are Aries, Gemini, Leo, Virgo and Aquarius and aspected or occupied by Saturn.
2. Ketu is placed in twelfth from Jupiter. It can be conjunct with Jupiter but Ketu is behind Jupiter.
3. Fifth house or lord conjunct trik lords and is in papa kartari.
4. Fifth lord is in twelfth house from lagan or from fifth house.

7. Lord of fifth from Moon is with Venus in a barren sign and aspected by malefic.
8. A benefic is placed in fifth house and gets no benefic aspect.

Chapter 7

Twins

Twin birth is birth of two or more children in a pregnancy. The difference in time of birth can be from three minutes to hours.

Classics have given combinations for twin births and for manifold births. These are our starting points and we give these combinations.

SARAVALI

1. When Sun and Jupiter are in Gemini or Sagittarius and are with or aspected by Mercury birth of twins takes place. Birth of two female children will take place when Venus, Mars and Moon are in Pisces or Virgo and in aspected of Mercury.
2. One male and one female child are born when lagan and Moon are in even sign and are aspected by a strong planet. Similarly children will be born when Moon and Venus are in common or even sign and are strong.
3. When Sun is in quadruped sign and other planets remain in dual sign in strength twins are born coiled by navel cord.
4. The first Dwadamsha of a sign decides the birth of twins. A dual Dwadamsha and male navamsha give birth of twins.

NARAD PURANA

1. When Mars, Venus and Moon are in dual sign and aspected by Mercury the twins are born.
2. When Moon and Venus occupy even sign and are aspected by a male planet, lagan, Mercury, Mars and Jupiter occupy odd sign this will give birth of twins.
3. Twins will be born when lagan and Moon occupy even or dual sign.
4. When Mercury is in its own sign or navamsha and aspects a dual sign or navamsha occupied by planets birth of twins takes place.
5. Birth of triplets is expected when Mercury occupies dual and even sign, in sign and navamsha, the last navamsha of Sagittarius is rising and strong planets occupy navamsha of lagan aspected by Saturn and Mercury there would be many children in foetus.

SANKETA NIDHI

1. When Mercury is in dual sign in lagan birth of twins is indicated. Also when Mercury is in tenth house even then twins are born.

YAVANA JATAKA

1. When navamsha of Mercury is strong in a cardinal house and also dual navamsha is on lagan or Moon the twins are born.
2. When a strong planet is in lagan and aspects a dual sign or navamsha and Mercury is in the varga of Moon it gives birth of twins.

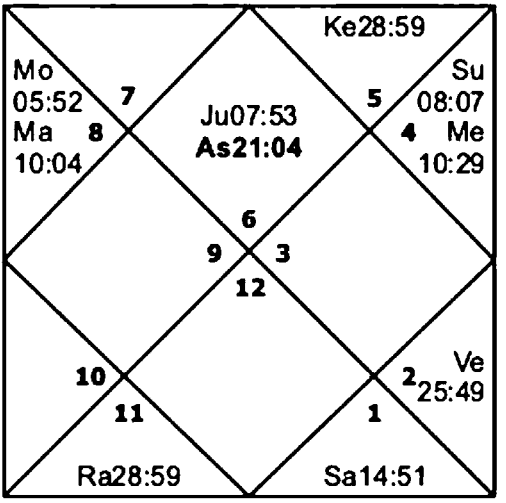

3. When Mercury is in lagan in the navamsha of a dual sign and is not aspected then twins are born.
4. When Jupiter is with Mercury or in a navamsha of dual sign and is in conjunction or aspected by Mercury in own navamsha then twins are born.
5. When all planets are in lagan of dual signs of Mercury or are aspected by Mercury then triplets are born.

SAPTAMSHA

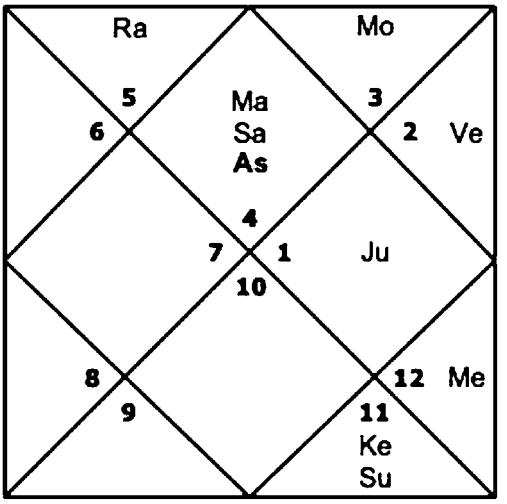

Saptamsha gives finer clue. We list some rules to check the possibility of having twins or more children in one pregnancy.

1. Lagan should be strong and associated with benefics promising birth of children.
2. The signs in trines belongs to fruitful or semi fruitfull category. The fruitful signs are Cancer, Scorpio and Pisces. The semi fruitful sign are Taurus, Libra, Sagittarius and Capricorn. Rest signs are barren signs.
3. In some cases the sign in lagan is a barren sign but lord of the sign is strongly placed in a fruitful sign.
4. KS or BS should be in the sign of dual planets, occupy a sign containing Rahu or Ketu, conjoined with dual planets in birth horoscope, in navamsha or in saptamsha. Saptamsha is more important.
5. Lagan lord of saptamsha is in dual sign in birth horoscope, navamsha or in saptamsha. It can be with a dual sign lord or in Rahu Ketu axis. Saptamsha is more important.
6. Sun is also gets connected with dual planets, sign or Rahu Ketu.

Chapter 08

Sex and Number

Number of children is the biggest curiosity of parents. It is a difficult area for astrology predictions and is an interesting field also. Many theories have been presented and are in vogue though predicting this is not exact and we default in doing it. We will discuss some methods of predicting the number of children.

1. Fifth house

Classics give the number of children is seen from fifth house. The number of planets associated with fifth house is the number of children one can have. This includes the number of planets placed in fifth house or aspecting fifth house.

We examine this on example charts given in this chapter.

Example 1

No planet is in fifth house. Fifth house is aspected by Saturn. Only one child is indicated. She has four children.

Example 2

Sun is in fifth house and is not aspected by any planet. Only one child is surviving. Two children were born.

Example 3

Fifth house is aspected by Saturn and there is no planet in fifth house. She has three children.

Example 4

Jupiter is in fifth house aspected by Saturn and Venus. He is not having any child.

Example 5

Ketu and Saturn are in fifth house and not aspected by any planet. She has two children.

Example 6

Moon, Mars and Saturn are aspecting fifth house. He has two children.

Example 7

Ketu is in fifth house aspected by Mars. He has six children.

Example 8

Ketu in fifth house is aspected by Jupiter, Mars and Saturn. She has nine children.

Example 9

Sun and Mercury are in fifth house aspected by Jupiter and Mars. She has two children.

Example 10

Fifth house is aspected by Sun and Mars. He has two children.

2. Navamsha Gained

In this method the navamsha gained by fifth lord is the number of children. It is the number of navamsha occupied by fifth lord. Say the lord is at 15 degrees in a sign. The navamsha is fifth. The maximum number of children is five.

In another version we see the navamsha sign occupied by fifth lord in navamsha. From this sign of navamsha we count up to the sign occupied by it in birth horoscope. Both signs in navamsha and birth horoscope are counted. The maximum number is arrived when we count from birth position to navamsha position.

We now apply it on example charts given in this chapter.

Example 1 - Venus is the fifth lord. It occupies seventh navamsha. She should have seven children.

By other version we note that Venus is in Aries navamsha. Counting from Aries to Aquarius we get twelve children.

Both are wrong. She has four children.

Example 2 – Fifth lord is Mars and it is placed in Virgo in third navamsha. In navamsha it goes to Pisces. He should have three children.

In other version we count from Pisces to Virgo giving a gain of seven signs.

He has two children.

The method is not applied on other charts. Esteemed readers can verify the method.

Modification – A modification is suggested to improve the method. In the journey of fifth lord from first navamsha to its position in navamsha we can ignore the signs occupied by malefic.

3. Astakvarga

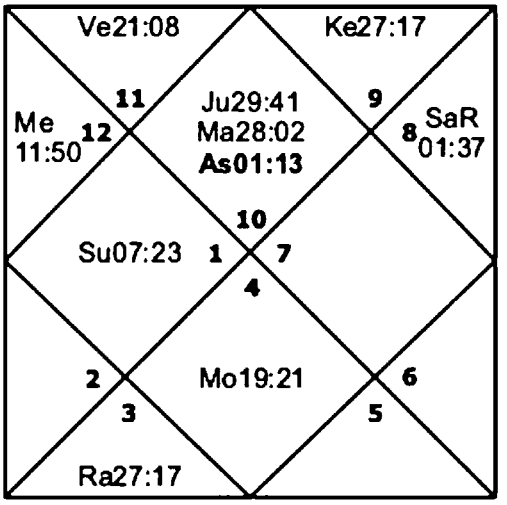

In this method we see the benefic bindu received in the BAV of a planet. This can be done in two ways.

1. We count the bindu in the fifth house from Jupiter in the BAV of Jupiter.
2. We count the bindu received by fifth lord in the BAV of fifth lord.

Certain **modifications** can be applied to get a better result.

1. Note the planets who have contributed bindu.
2. When the planet is exalted then it gives three children.
3. When it is in own sign its contribution is two children.
4. When contributor is with Ketu or Saturn then it is not promising birth of child.

2. Saptamsha

This method of deciding the number and sex of children is revealed by the grace of GOD in 2007. GOD has been kind and earlier revealed progress Yogini Dasha and locating disease by his blessings. I bow to lord for bestowing his blessings. This method gives results over 95% accuracy. I feel that some areas still need further clarifications.

1. Sun, Mars, Jupiter, Rahu and any exalted planet are male.
2. Moon, Venus, Ketu and any debilitated planet are female.
3. Mercury and Saturn are common gender and can be male or female.
4. Aries, Cancer, Leo, Libra, Scorpio and Sagittarius are male signs.

5. Taurus, Virgo, Capricorn, Aquarius are female signs.

6. Gemini and Pisces have two bodies in their symbol. Gemini has one male and one female so it can be male or female. Pisces is represented by two fish. Fish can be male or female. Pisces also can give male or female.

Method

1. When the lagan of saptamsha is an odd sign, the first child is seen from fifth house in direct order. The next child is third from first and is seen from seventh house. After counting six children the seventh will be one jump only and not mandook jump. Thus the sequence is 5, 7, 9, 11, 1, 3, 4, 6, 8, 10 and 12th house.

2. When the lagan of saptamsha is an even sign, the first child is seen from fifth house in indirect order. The next child is third from first and is seen from ninth house. After counting six children the seventh will be one jump only and not mandook jump. Thus the sequence is 9, 7, 5, 3, 1, 11, 10, 8, 6, 4 and 2nd house.

3. For a particular child we will take the lord of sign as lord of child. Say for child indicated by Leo we take Sun as lord of child.

4. See the sign occupied by lord of child in navamsha. We will name lord of sign of navamsha as decider of child.

5. Now check the decider in saptamsha for its placement to decide the sex of child.

6. The sign occupied by decider in saptamsha is of first importance. Next to be considered is sex

of decider and the sex of planets aspecting or conjoined with decider. This is subject to change as given in point 7.

7. When the decider is in exaltation or in own sign in navamsha or saptamsha than decider is the main factor to decide the sex. The sign occupied becomes secondary.

8. When decider owns two signs then the sex of the sign occupied by lord of child in navamsha is important.

9. The counting stops when;

   a. Ketu is alone in the house of child. This will be the last child.

   b. Ketu is singly with lord of child in saptamsha. There is no association with any other planet. This will be the last child.

   c. Ketu is alone with decider then this will be last child. If it is associated with other planet then it is not so.

   d. Ketu is placed in the sign of decider in navamsha or saptamsha. This will be the last child.

10. When the lord of child is in trik houses from lagan or from the child house and under affliction then that child do not take birth or is short lived.

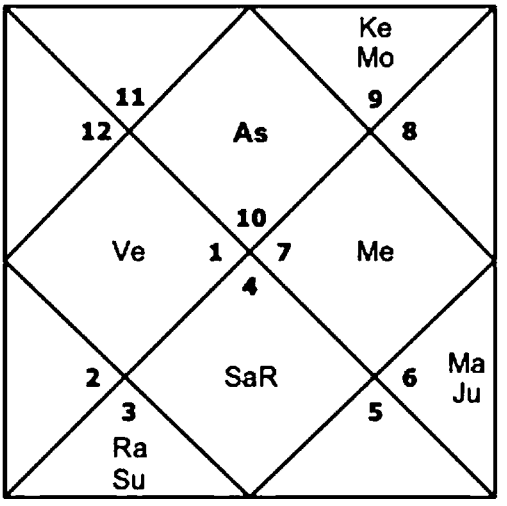

11. Horoscope of mother is better indicator for number of children.

12. Horoscope of father is better indicator of sex of children.

Chapter 09

Timing of Child Birth

Timing of an event is a dynamic promise. The birth horoscope is a static promise. This dynamic promise is Dasha. Dasha can be of planets or signs. When a Dasha shows promise of event than only the event happens. **This is the basic principle of interpreting Dasha.**

We will underline some rules to interpret a Dasha.

Vimshottary Dasha

Vimshottary is the main Dasha for Kaliyug. It is a planetary Dasha. The seed of this Dasha is the nakshatra occupied by Moon in birth horoscope.

MD

1. First we check the MD. MD should be related to the house, house lord or karaka under consideration. In our discussion it is fifth house, fifth lord and Jupiter.
2. In case MD is not so related in birth horoscope we check MD in navamsha. It must be related to house, house lord or karaka. MD should improve its qualification in navamsha to give results. If it has one relation in birth, than in navamsha it should have at least one relation. If it is not so it cannot give the desired results.

3. AD is the executive and it is his responsibility to give results.
4. AD is checked in birth horoscope, navamsha.
5. Any Dasha of lagan, second house, tenth house, fifth house or tenth house in any divisional chart is capable of giving results. This can be of planets in these houses, lords of these houses, planets with or aspected by lords of these houses.
6. PD should be related to the houses in saptamsha as mentioned in 5th point above.

Char Dasha

1. Make the current MD sign as lagan for the Dasha period of MD.
2. The MD lord is checked for its placement from MD sign.
3. From MD sign check the fifth and ninth house.
4. Note the lord of fifth or ninth house.
5. The lord or house must be related to PK or the fifth or ninth house of birth or their lord to deliver the result in the MD.
6. AD is then checked in similar way.

Progress Yogini Dasha

1. Work out the progress nakshatra and progress lagan for the current Dasha.
2. Make the progress lagan as lagan for the Dasha period.

3. First check the progress nakshatra lord in progress chart. The nakshatra lord must indicate the birth of child by its position in progress horoscope.

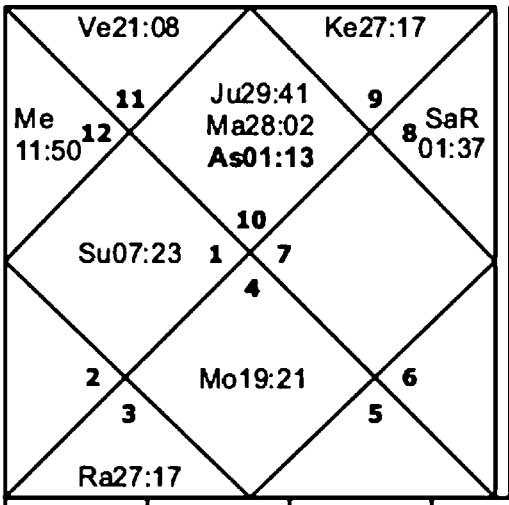

4. Progress nakshatra must influence or relate to fifth or ninth in progress chart.

5. When progress lagan is odd Dasha will mostly relate to fifth house. When lagan is even it will mostly relate to ninth house.

6. See the AD from progress lagan.

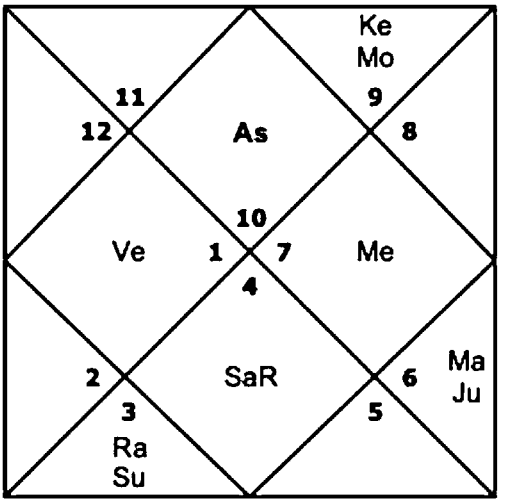

To learn progress Yogini Dasha refer to book "Snapshot Prediction using Yogini Dasha " by V. P. Goel and published by Sagar Publications.
