Saptamsha D7

Saptamsha is the seventh division of the horoscope. It highlights the fifth house affairs of the horoscope. It underlines the affairs of seventh house and the marital activity which results in procreation.

The saptamsha chart is seen for Poomata (complete fulfilment), luck factor from past life (Poorvajanam Punya) and its impact on the present life, children and grand children, Mantra Siddhi, speculation, students and disciples, prosperity of spouse, creativity and the realisation of results.

Each Sign is divided into seven equal parts called saptamsha division. Each saptamsha division measures 4^{3}17'8.57"(4 degrees, 17 minutes 8.57 seconds)

Parashara Saptamsha

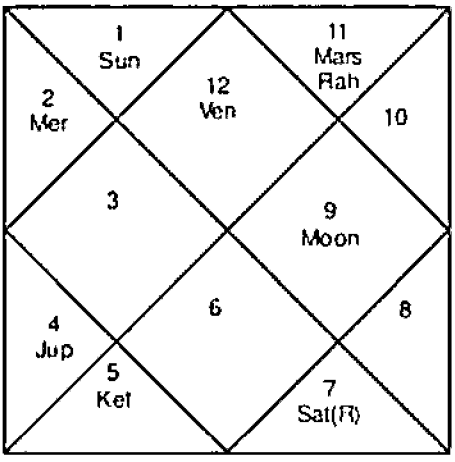

For a planet placed in odd sign in the birth chart, the first saptamsha remains in the same sign. The next saptamsha goes to the next sign in direct order in D7 chart. For an even sign the planet placed in first saptamsha goes to the 7th sign from the sign occupied by it in DI. The second saptamsha goes to the next sign to 7" and so on. This method of casting D7 chart is followed commonly. This is a cyclical chart.

Example 1

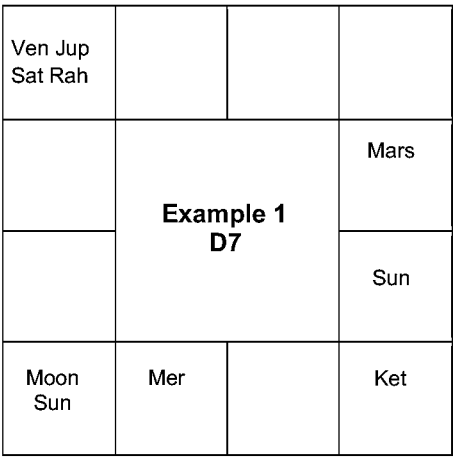

The saptamsha chart is erected for the example chart given here. The Lagna is 4-07' and is an even sign Pisces. It is in first saptamsha and goes to Virgo in D7. Sun is 18°13' in Aries, an odd sign, and in fifth saptamsha. Counting from sign itself, Sun moves to fifth sign i.e. Leo in D7. The placement for other planets is worked in same way and

the saptamsha chart is casted in same way.

Each of the seven saptamsha of a sign is identified with a codal name. These codal names are the state of the present life which we have developed through our many past lives. This indicates the gradual emancipation of soul from mundane to spiritual.

The codal names and their meanings are -

1. Kshar ({Up - A type of salt. Experience of the sturdy, harsh and difficult path of life.
2. Kshira {{kji) - Milk. Gets happiness through worship, singing praises of Lord.
3. Dadhi (nf/) - Coagulated milk. Steadiness in the path of realisation (sadhna) or attempts to realise.
4. Ajyam (vftje) - Clarified butter. Fruitful stage of sadhna, attainment of quietude.
5. Ikshu (b{H4- Sugarcane. Enjoyment of bliss.
6. Madhya (e|)- Wine or intoxicating drink. Bliss increases and enjoys as an intoxicated person.
7. Suddha Jal (' Ity ty) - Pure Water. The ever blissful stage is revealed.

The first saptamsha of any odd sign is Kshar. For even sign the order is reversed.

Saptamsha allocations		
Sapta msha	**Odd Sign**	**Even Sign**
First	Kshar	Suddha jal
Second	Kshira	Dadhya
Third	Dadhi	Ikshu
Fourth	Ajyam	Ajyam
Fifth	Ikshu	Dadhi
Sixth	Madhya	Kshira
Seventh	Suddha jal	Kshar

Let us see the example chart 1 of this chapter.

Lagna is even sign and is in first Saptamsha which is Suddha jal. Lagna lord Jupiter occupies Ikshu saptamsha. Moon is in Kshar saptamsha. Sun occupy the Ikshu saptamsha. The body and soul are in high state of spiritual bliss but the mind experiences the harsh facts of mundane world.

Examinations of Saptamsha -

1. A strong lagna of D7 assures birth of children.
2. Lord of lagna of the birth chart should not be placed in 6,8,12 of saptamsha. If so, it shows no good relation with your own children. A san example if Lagna lord of birth chart is in 8th house of D7, it generally show a uncordial relation with progeny.
3. In saptamsha fifth house shows first child, seventh house is second child and so on. This rule can be used to see the relation with a particular child of yours. It is also used for determination of sex and all things about a particular child.
4. Genetic link between parents and children. The DNA test is done astro logic ally on the horoscopes of parents and the child. This method is taken from the book "Planets and Children" by Sh. K.N. Rao. It says that the Mars and the Moon of child must establish a relation with 5th house/lord or house/lord of the parents.
5. Children from second marriage are seen from seventh house.
6. Saptamsha chart shows the future lineage i.e. children and grand children. Dwadamsha chart is the past lineage i.e. parents and grand parents. This chart therefore shows the continuation of the family or the end of it.
7. The eighth house of D7 is the indicator of karmas of past life which prevents the birth of progeny. The fifth house of birth chart shows the curses and the causes of denial of children. These curses are given by Parashara as the curse of father, mother, sarpa etc. These are given in the book 'Planets and Children" by Sh. K.N. Rao.
8. Rajyoga present in saptamsha gives highly placed children or the person is very intelligent.
9. Dhana yoga indicate many children.
10. Ninth lord when related to eighth house gives children by adoption.
11. Some combinations of saptamsha chart are given in Mansagri and are reproduced here for the benefit of readers.

a. When the lagna lord of saptamsha is conjoined oraspected by Moon or other benefic planets, then the person has real brother and will be energetic, have fame, many friends but will be restless.

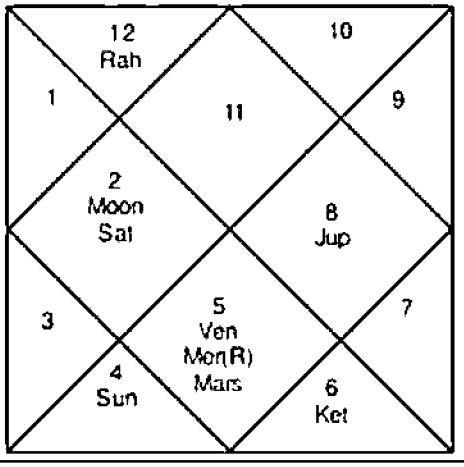

b. The strongest planet among the debilitated planets in saptamsha (except Sun) will be the significator of brothers.

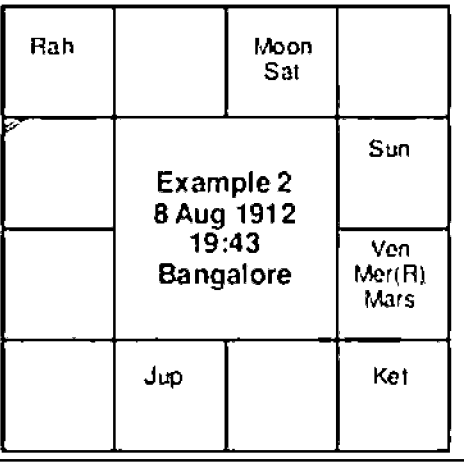

c. When Sun, Jupiter or Mars is placed in third house, the person will enjoy pleasure of wealth and a son will be bom after the death of his father. If Venus, M oon or M ercury is in third house, then a daughter is born after the death of his father.

d. When all planets are exalted in saptamsha, the person is very rich and if all are debilitated then very poor.

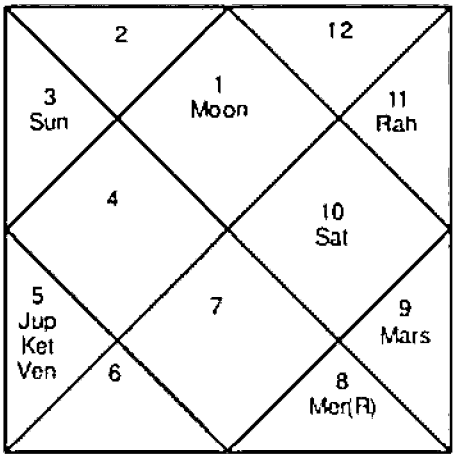

Example 2 - many children

Dr. B.V. Raman was blessed with nine children. The saptamsha

Lag	Sun	Moon	Mars	Mer	Jup	Ven	Sat	Rah

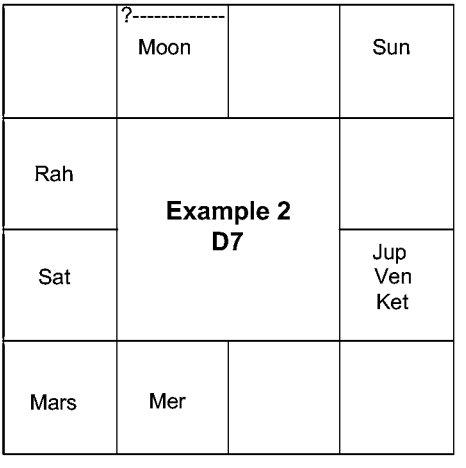

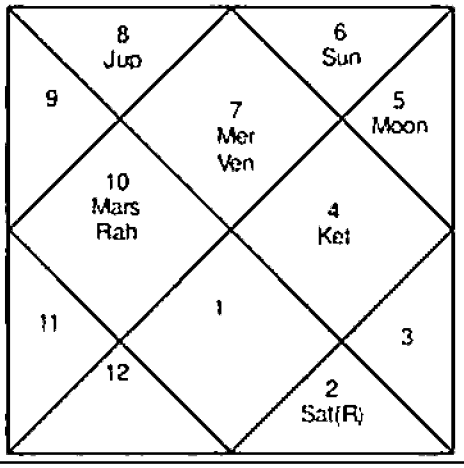

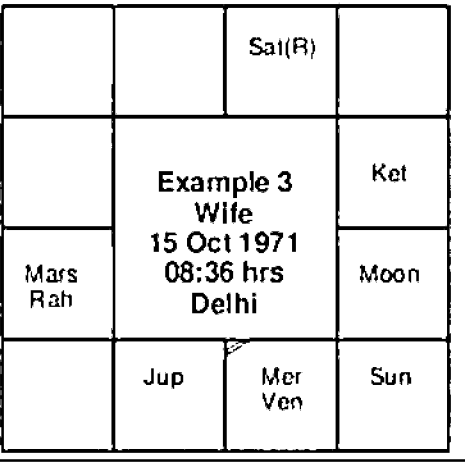

chart is seen for all aspects about children. A dhana yoga in D7 promises abundance of wealth ofsaptamsha. Lord of second house is with ninth lord and aspects eleventh house. The eleventh lord Saturn is in Kendra in its own sign and causes Sasha yoga.

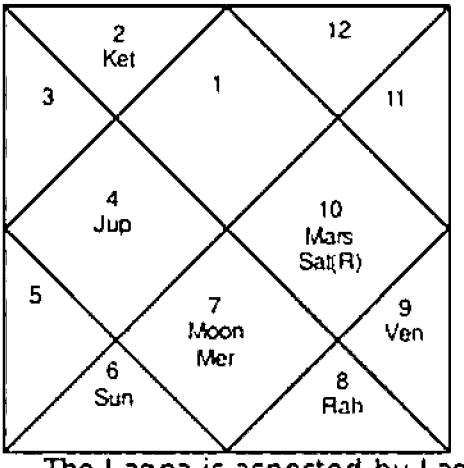

The placement of Ketu in fifth house gave sorrow due to premature death of eldest son.

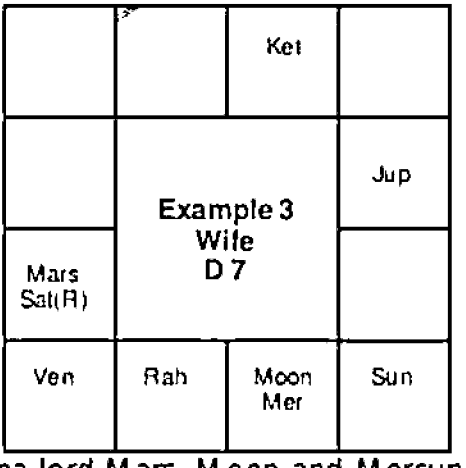

Example 3 - Adoption (Wife)

Lag	Sun	Moon	Mars	Mer	Jup	Ven	Sat	Rah
25°45'	27°38'	11°56'	26°05'	02°14'	11°59'	10°29'	12°27'	18°46'

The Lagna is aspected by Lagna lord Mars, Moon and Mercury. Mars is afflicted by Saturn. Jupiter aspects the Lagna lord and give hope of getting progeny. Two malifics are forming papa kartari on 7th house.

Fifth house is aspected by eighth lord Mars, fifth lord have moved to sixth house without any benefic relation. Bad fifth hosue do

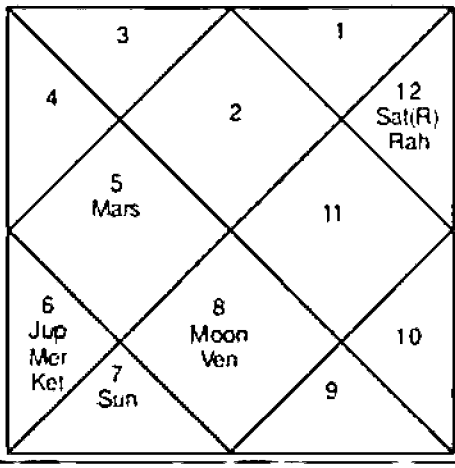

not promise own child but strong Lagna indicate children.

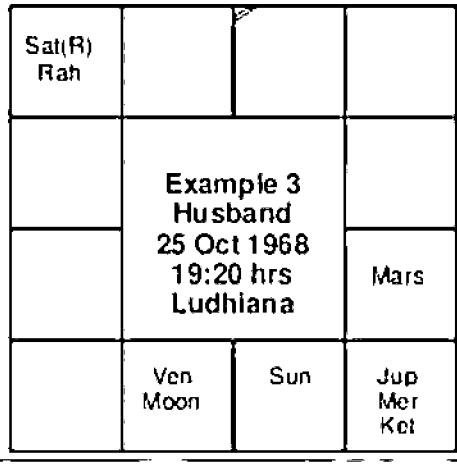

Wife is having dasha of Mars, who is Lagna lord and can give child. Lords of 9th and 8th house are in mutual aspect, which is a combination of adoption. She adopted a child in 2009.

Example 3 - Adoption (Husband)

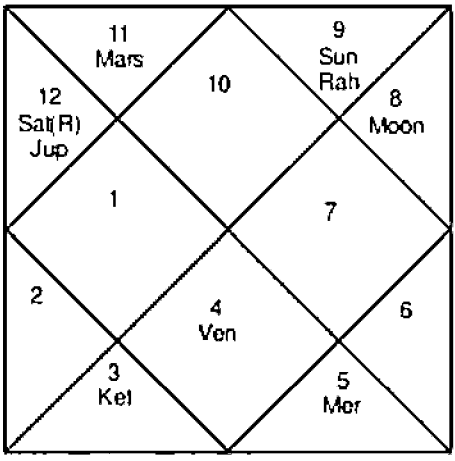

We examine the saptamsha chart of the husband. Lagna contain no planet and is in papakartari. Venus aspect the Lagna and is the hope of getting a child.

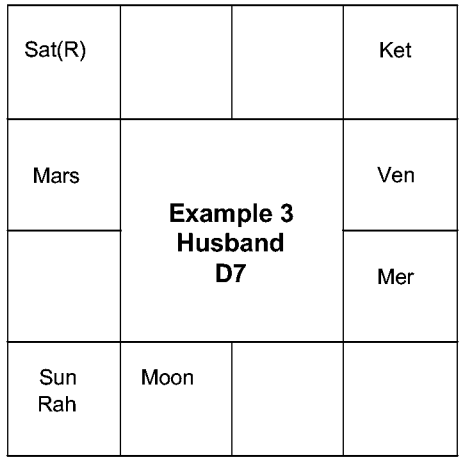

The fifth house is aspected by retrograde Saturn and M ars. M oon is the seventh lord and also aspects fifth house. Looking into ninth house, the story is same. It is aspected by Saturn, Mars and Jupiter. Ninth lord is in eighth house aspected by Mars. He was advised to adopt a child. Both husband and wife have combination of adoption of child.

Lag	Sun	Moon	Mars	Mer	Jup	Ven	Sat	Rah
09°03'	08°47'	29°37'	27°35'	22°22'	02°42'	11°53'	27°51'	16°02'

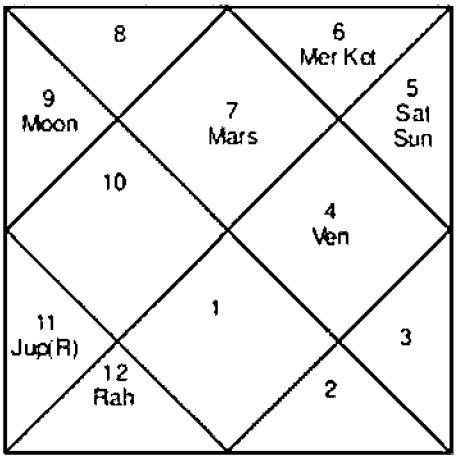

Example 4- Deformed child

Boy was bom with physical problems and is a source of anxiety to the parents.

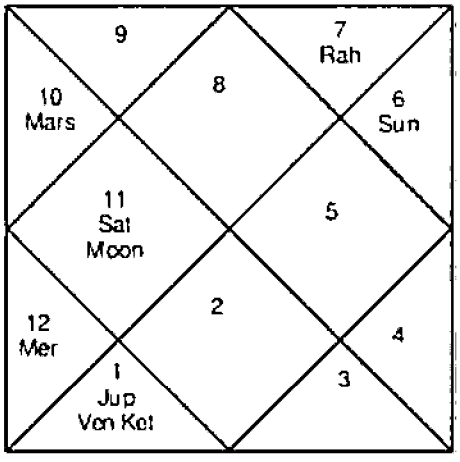

In saptamsha chart, M ars is the Lagna lord and is exalted. Lagna is aspected by Saturn and there is no benefic aspect. There is promise of progeny but with delay and problem.

Now we see the fifth house. Mercury is lord of eighth house and is placed in fifth house. Jupiter is the fifth lord and occupy sixth house with Ketu. It is aspected by Mars and Saturn. All these malefic relations in sixth house have given a sick child.

Fifth house is aspected by Saturn who is sixth lord. The fifth lord Jupiter is in twelfth from 5th house. Ninth house is afflicted by Rahu. The twelfth lord Moon joins it and is aspected by Saturn. Both ninth house and lords have malefic associations. Since lagna is promising and the fifth/ninth house is not promising, the result is adoption.

Example 6

Very powerful Rajyogas are present giving here very famous children or disciples.

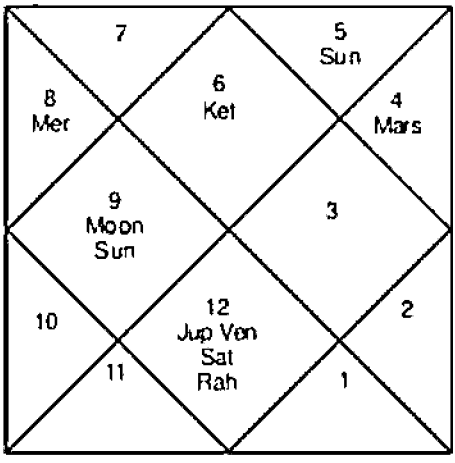

The trines are afflicted by Saturn and Mars which is the combination of adoption. Fifth hosue is aspected by debilitated eighth lord M ars. Ninth house is aspected by fifth lord. Ninth lord is exalted in seventh house.

Sex of Children

Many astrological methods of judging the sex of the child and the number of children and available. Some claim a success rate of 80% which is excellent. These methods generally fail to give number and sex of children.

The method of judging the sex of children have been researched by the author. It has given good results so far.

Sex and numbers cannot be seen only from saptamsha of a person. Ihe role of spouse has to come into play. This method therefore involves linking of birth chart, navamsha and the saptamsha. The details are not revealed here since the method can be misused.

Beeja Sphuta and Kshetra Sphuta

Beeja Sphuta (BS) and Kshetra Sphuta (KS) are mathematically derived points for a horoscope. BS is worked out for a male horoscope and KS for a female horoscope. This point indicates the capability to produce a child and the worthiness of children.

Beeja sphuta is the sum of the longitude of Jupiter, Venus and Sun. The longitudes are taken from first point of Aries. The BS should be in a odd sign in rashi chart, navamsha and saptamsha charts to promise progeny. We examine the BS and its lord in all three charts.

Kshetra sphuta is the sum of the long itudes of Jupiter, M ars and Moon in female chart. The KS and its lord should occupy even sign in Rashi chart, navamsha and saptamsha chart.

The lagna lord, fifth lord of birth chart and Jupiter are seen in the saptamsha for their placement, conjunction and aspect received by them.

The lord of BS or KS in saptamsha chart is seen for luxuries. It should have good relation with Lagna lord and fifth lord of birth chart in saptamsha and well placed in D7 to grant a luxurious life.

If it is in 6,8,12 from birth Lagna lord it gives physical problems, when it is in 6,8,12 from fifth lord of birth chart then problems due to poorva punya.

The placement of BS or KS is checked in drekkana also to see the capability of getting progeny.

Jataka desmarga gives another method of working out BS and KS. The method is now explained.

Divide the expired portion of star occupied by Jupiter in ghatis and vighatis by 5. The resultant gives the longitude of Jupiter for this purpose. Similarly workout the longitude for Sun and Venus. Add the resultant figures to get beeja sphuta.

In the similar way workout kshetra sphuta from the star occupied by Jupiter, M ars and M oon.

A simplified version of this method is now given. Each star is of 13°20' and the rule implies that each star is equal to 12 signs. Therefore 1 degree 6 minutes 40 seconds of longitude is equal to one sign. Each division of r6'40"is equal to 30 degrees of the sign and we can work out the degrees from the incremental part over the expired star longitude. A ready table given.

As an example, let us take longitude of Jupiter as 24-25'. The star occupied is Bharani which commences from 13°20'. Jupiter has moved 11°5' in Bharani (24°25'-13°20'). It occupies Capricorn as nine parts are completed. The longitude is worked out with the help

of table given.

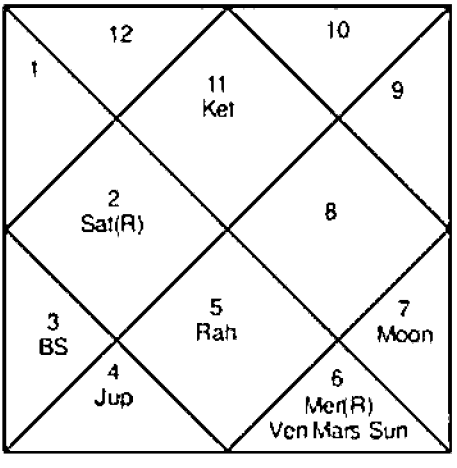

Table for sign in division of star			
Longitude of planet from the beginning of a Star (upto)			Sign

1	6	40	Aries
2	13	20	Tau

8	53	20	Sco
10	0	0	Sag
11	6	40	Cap
12	13	20	Aqu
13	20	00	Pis

Now for degrees of Jupiter in Capricorn, we note the start of Capricorn or end of ninth part i.e. $10^{3}0'0"$. The travel in this part is 1°5'. Converting it into second we get 3900 seconds. Each full part signifying a sign is $l^{3}6'40"$ or 4000 second. The degrees of Jupiter is (30 X 3900)/ 4000 =$29^{3}15'$.

1st Method (Standard)

	s	deg	min
Jupiter	3	0	32
Venus	5	15	11
Sun	5	24	22
Total 2		09	05

In birth chart BS is in Gemini. In navamsha it is in Sagittarius, in Saptamsha it is in Leo and in drekkana it is in Gemini.

In all three vargas i.e. DI, D7 and D9 BS is in odd sign promising progeny. The lord of BS in all these charts is well placed.

The placement of BS in a kendra in saptamsha and the conjunction of lord of BS w ith BS assures luxuries and comforts in life. From lord of Lagna it is in sixth house and indicating physical problems.

2nd Method (Jataka Deshmarg)

We have to first work out the longitude of Jupiter, Sun and Venus in the star occupied by each.

Planet	Star	Longitude (A) S D M	Beginning of Star (B) S D M	A- B S DM	Longitude S D M
Jupiter	Punarvasu	3-0-32	2-20-0	0-10-32	9-14-24
Venus	Hast a	5-15-11	5-10-0	0-5-11	4-20-15
Sun	Chitra	5-24-22	5-23-20	0-1-2	0-27-54
					Adding 3'--02ª-33'

With second method BS is in Cancer. The navamsha sign is also Cancer and the sign in Saptamsha is Capricorn. All are even sign and progeny is not promised.

Learned readers are free to arrive at their conclusion about the two methods.
