Dwadashamsha D12

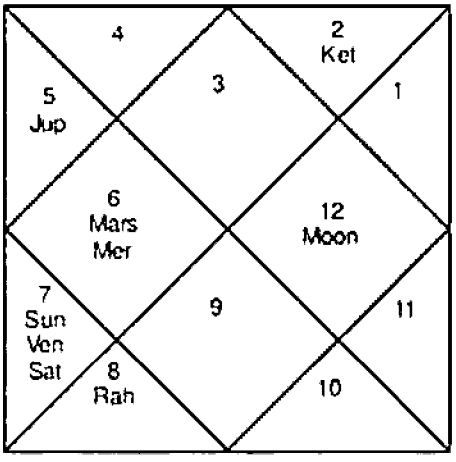

Dwadashamsha is the one tw elfth division of each sign. This chart is also known as Suryamsha signifying the parents and grandparents.

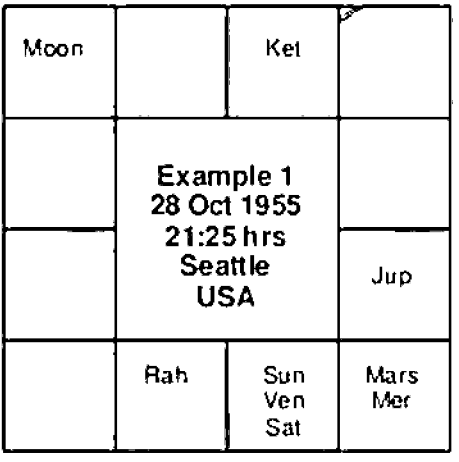

Parashari Method

Each dwadashamsha division is of 2 degree 30 minute. The first division starts from the sign occupied by the planet in Lagna chart. The next division goes to the next sign in direct order. A ready table for this Parashari method of casting is given.

Longitude of planets/Lagna in D12 chart.

Multiply the longitude of planet (without considering the sign) by 12. Expunge multiples of 30 and the remainder is the longitude of the planet in dwadashamsha.

In example chartthe longitude of Lagna is 26°-57'. Multiplying it by 12 we get 323°-24'. Expunge 300 from it and we get 23^3-24' as the longitude of Lagna in dwadashamsha chart. Lagna is in Uth dwadashamsha. Counting directly from gemini, the eleventh sign is Aries and is the lagna of dwadashamsha chart. The placement of planets is worked in similar way and the complete chart is given.

Application

This chart is seen for all things about parents and grand parents, the lineages of the person, it is the link between past and present life, i.e. poorva janam link, the further continuation of his lineage or not, Gotra of the person, inhentance from parents. Dwadashamsha indicate the cause of evils and its cure. Trimshamsha shows the evils.

This chart is for parents. To differentiate between mother and father, the karakas or significatiors are used. Sun is the karaka for father and M oon is the karaka for mother. Ninth house is taken as Lagna of father and fourth house for mother.

House significations of dwadashamsha

First House - General relations with the parents/grand parents. The general condition of the parental family and the influence a person gets from his family.

Second House - The sanskarof the family. The wealth and social status of the family and parents. The support native gets from parents.

Third House - It is maraka place for father. Efforts of parents.

Fourth House - Mother, It is eighth from 9th and 9" from 8tn house and shows the longevity of father. Happiness of family.

Fifth House - Past karmas of parents. It is 9th from ninth so it denotes the grand parents. It is also fifth from Lagna and is the child of the parents as such it represents the person whose chart is seen. Thus the relation of fifth house with Sun, Moon, 9:r house and 4tr house will indicate the relation of native with parents. It also shows the future generation.

Sixth House - Debts of the parents which may be inherited by the native. Profession of father. The diseases and capacity to fight.Diseases of the parents which are passed on to the native.

Seventh House - The partners to promote or to continue the lineage of the family. The spouse of the native is seen from it.

Eighth House - Inheritance from the parents. This can be the help taken from them.

Ninth House - The house for father and the dharma of the family. The religious training received from them.

Tenth House - M araka house for both mother and father. It is the karma house of the parents. The karmas performed by parents towards their parents.

Eleventh House - The gains from the parents. This may be monetary help taken from the parents by the native and inter-alia shows the gains of the parents which they can share with you.

Twelfth House - This house indicate your lineage, Gotra etc. This house is 4th from 9" i.e. your paternal grand mother. It is also 9th from 4th i.e. your maternal grand father. The gotra of the family is decided by the planets in 12th or the lord of the 12th house along with modifying influence on them.

Sun, Mars and Moon are kshatriya, Venus and Jupiter are Brahmins, M ercury is vaishya and Saturn is Shudra. In actual application, this rule does not apply universally.

Karakas

Naisargika Karaka - Sun is the karaka for father and Moon is the karaka for mother.

Jaimini Chara Karaka - In the scheme of seven chara karaka, M K is the Karaka for mother and BK is the karaka for father. Sh. K.N. Rao suggests that PK should also be considered for father.

Sthira Karaka - The stronger of the Sun and Venus is taken as karaka for father. Stronger of M ars and M oon is the karaka for mother. Rahu and Jupiter are the karaka for parental grand father. M ercury and

Ketu are the karaka for maternal grand parents.

Ruling Deities of Dwadashamsha

M aharishi Parashara has assigned the non-planetary lords of each division of dwadashamsha. These are Ganesh, Ashwini Kumar, Yama and Ahi or Sarpa. They repeat three times in 12 dwadashamsha. For any sign the first dwadashamsha is ruled by Ganesh, second by Ashwini Kumar, third by Yama and fourth by Ahi. This cycle is again repeated from 5" dwadashamsha and so on.

Table of deity of dwadashamsha is given here -

Deity of Dwadashamsha	
Division of dwadashamsha	**Deity**
1. 5. 9	Ganesh
2. 6. 10	Ashwini Kumar
3. 7. 11	Yama
4. 8. 12	Ahi

Ganesh - Ganesh is the destroyer of all obstacles which can be in your material or spiritual path. This division indicates divine protection to the native provided by parents. These can be education, care in illness, providing right direction etc.

Ashwini Kumar - They are divine healers and bless with good health care. These parents are of caring nature. The planets in this division bestow the caring nature to parents.

Yama - Yama is the lord of death. He is disciplined and just. His rules are rigid and not at all flexible. The planet in this division show a disciplined planets.

Ahi - The serpent. It is the resting place for Lord Vishnu. The snake has venom and imparts it to the planet placed in this division.

When we understand the division of dwadashamsha, we notice that each drekkana of a sign is divided in four dwadashamsha. Therefore one drekkana of a sign contains four division ruled by all four deities. Parashara have classified Drekkana as Narad, Agastya and Durvasa.

We can have the combination of Drekkana deity and dwadashamsha deity to closely identify the planet. Any planet in Narada/Ganesh should be auspicious. A planet in Agastya/Yama should be rigid. Planet in Durvasa/Sarp a is full of vengeance. Navamsha have been given codal ruling deity as Devta, Manushya and Rakshasa. Combining these three divisional charts and their deities we get a fairly good idea of the condition and nature of any planet.

Examination

1. Sun is the significator of father and Moon is of mother.
2. Ninth house is the lagna of father and fourth house is lagna of mother. For father the maraka houses are 10", 3^{C} and the house of longevity is fourth house of dwadashamsha. The fifth and tenth house are maraka for mother and the eleventh is the house of longevity.
3. See the ruling deities of Sun and Moon in the drekkana, navamsha and dwadashamsha to assess the nature of parents towards the native.
4. M oon afflicted shows pain to mother. Sun afflicted shows pain to father.
5. M ercury/Ketu is seen forthe maternal lineage and Jupiter/Rahu is seen for paternal lineage.
6. Jupiter, fifth house and fifth lord are the poorva punya and show whether the person can be father or not. If they are afflicted then no male child is bom.
7. Lagna of dwadashamsha represent parents and the fifth house is the child of the parents and represents the native. In the astrological scheme, the lords of trines are friends to each other.

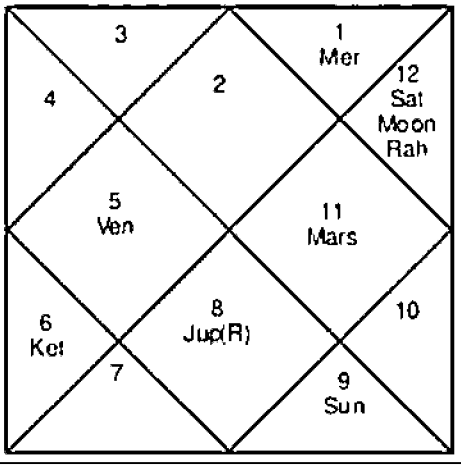

Thus to see the mutual relation of parents and the native, we can check the placement of these two lords from each other.

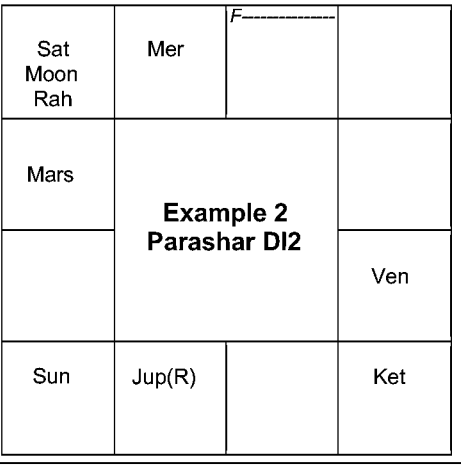

8. Dhana yoga indicates wealthy parents.
9. Raj yoga indicates highly placed parents.

Example 2 - Indira Gandhi

The Lagna of D12 chart contains no planet. It is aspected by Jupiter (8tr and 11th lord), Saturn (9r and 10th lord) and by Mars (7*' and 12tr lord). She got affluent parents since Lagna has influence of Yaga karaka Saturn and the eleventh lord Jupiter. The aspect of 8:"lord Jupiter and 12th lord Mars gave separation from parents. The Lagna lord Venus is well placed in kendra but is aspected by 12th lord Mars.

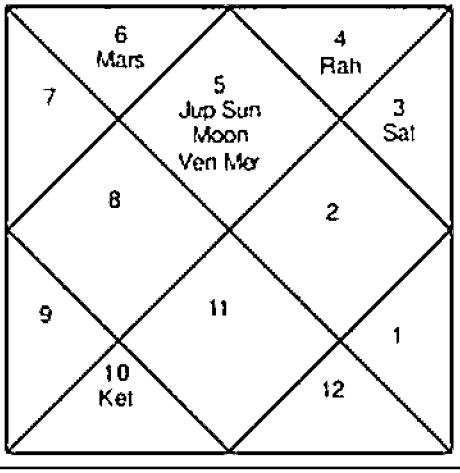

The karaka of father Sun is placed in 8th house and aspected by Saturn. Saturn occupy Durvasa/Ganesh/Manushya divisions and father is protector with Durvasa attitude and human mind. There is no other affliction and Saturn is yogakaraka.

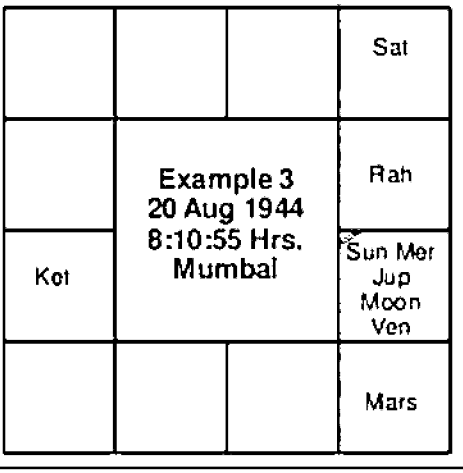

M oon on the other hand is with Saturn and Rahu. Rahu is placed in Durvasa/Sarpa/Rakshash. This gave short life to mother. The Moon is further aspected by 8th lord Jupiter.

A benefic in 7th house promises a noble spouse. Jupiter is retrograde and is also the lord of two malefics houses give short life to the spouse.

Further lineage is seen from 5th house. Ketu in Sarpa dwadashamsha gave short lived children. The aspect of yogakaraka Saturn gives high position to children.

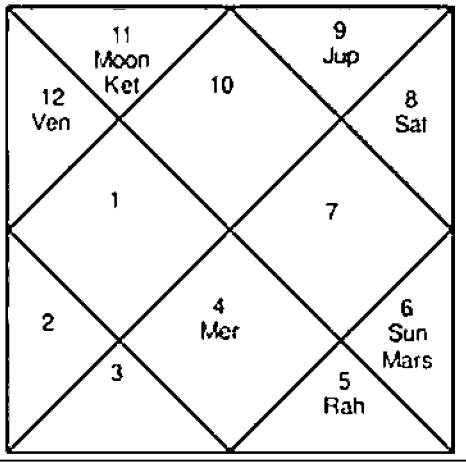

Example 3 - Rajiv Gandhi

Lagna of D12 is aspected by its own lord Saturn and the ninth lord Mercury, making it strong. Mercury is in Sarpa dwdashamsha and is not good for general welfare of maternal side. His mother was the only child of her parents.

Kanaka of father is with Mars and is aspected by Venus who is in Durvasa/Sarpa giving problems and short life to father.

Moon is with Ketu and is a combination for widowhood to mother. Since Sun is afflicted, this promise becomes more effective. If we treat fourth house as the Lagna of mother, the seventh house from there is in papa kartari. His father expired in Sun mahadasha.

A benefic in 7th house assures a good wife who will be able to continue the lineage.

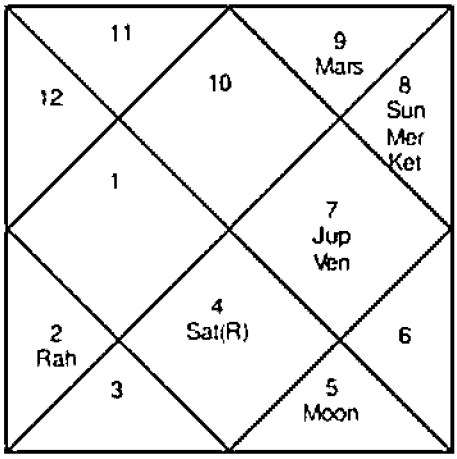

Example 4- Sanjay Gandhi

Lagna of dwadashamsha is occupied by its lord Saturn along with exalted Mars, two benefics Venus and Jupiter aspect it. Ihe Lagna is strong.

In this chart also Mercury is in Sarpa dwadashamsha and the maternal side is afflicted.

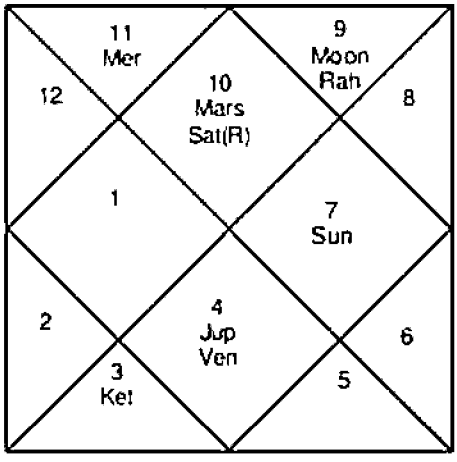

The karaka of father is debilitated and is in Narad/Sarpa dwadashamsha. Sun is aspected by retrograde Lagna lord Saturn.

Moon is with Rahu. Rahu is in Durvasa/Sarpa and is the cause of

Two benefics in seventh house gives continuation of lineage.

Let us see the similarity of dwadashamsha chart of two brothers

and we can appreciate the depth of know ledge passed on to us by our great sears.

Placement of planets in Yama or Sarpa dwadashamsha is not a good position and does harm to the significations of the planet. Such a planet cause heavy affliction to the planet it associates by conjunction or aspect.

Cyclical Dwadashamsha

In this method of casting the first dwadashamsha of each sign starts from Anes.

Cyclical dwadashamsha is seen for physical or materialistic aspect of the parents.

Example 5

This chart given as example 2 is taken for casting and analysis for cyclical dwadashamsha.

The cyclical dwadashamsha chart is having good Raj yoga and Dhana yoga. The parents are highly placed and rich. Venus is Yoga karaka being lord of a kendra and a trikona. Venus is placed with Lagna lord Saturn in eleventh house and is a powerful Raj yoga.

Lagna is aspected by own lord Saturn and as such Lagna is strong.

		Sun	Moon
	Example 5 *(example 2 of this chapter)* **Cyclical D12**		Rah
Ket			
Ven Sat		Mars Jup	Mer

From M oon

From Moon, Venus and Saturn are lord of trines as also the lords of eight and twelfth house. The Raj yoga is not caused. Mars is the most malefic planet for Gemini Lagna being lord of eleventh and sixth, both trishadaya houses. M ars is joined by Jupiter, a maraka for Gemini. Serious arishta yoga is present. Moon itself is the maraka and is aspected by another maraka Jupiter. Venus and Saturn also aspect Moon. Her mother died in her Rahu dasha.

From Sun

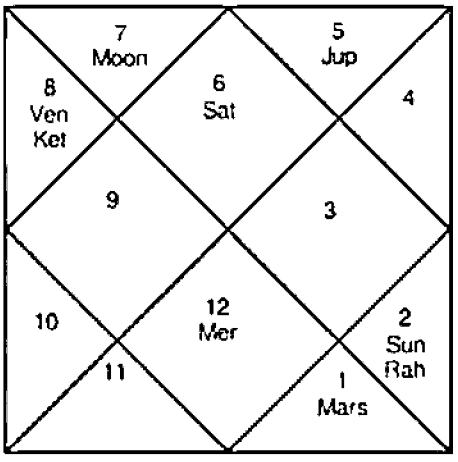

Venus and Saturn are forming a powerful Raj yoga in eighth house. The formation of Raj yoga in eighth house conveys its own meaning.

Jupiter is the most malefic planet for Tauras Lagna being lord of two trishadaya houses. Mars join this Jupiter. Mars is the lord of maraka seventh house and the twelfth house. Her father died in her Jupiter M ahadasha.

Example 6

This example is repeat of example 3 of this chapter. It is discussed again for cyclical dwadashamsha.

Lagna is occupied by fifth lord Saturn and aspected by Lagna lord Mercury. Saturn is lord of sixth house also. The Lagna is strong but indicate problems also. Lagna is in shubha kartari giving further strength to Lagna. From Lagna there are no potential Raj yoga or Dhana yoga.

Mer	Mars	Sun Rah	
	Example 6 *(example 3 of this chapter)* **Cyclical DI 2**		
			Jup
	Ven Ket	Moon	Sat

From M oon

Moon is aspected by Mars. Mars is in its own sign and is a powerful maraka for Libra Lagna. The lord of Lagna Venus is aspected by Yoga karaka Saturn giving Raj yoga results. The second house from Moon is occupied by Lagna lord and aspected by eleventh lord Sun, as well as fourth and fifth lord Saturn and second lord Mars giving Dhanayoga. Presence of Ketu in second house and aspect of trine lord Saturn makes Ketu a first rate killer for mother. His mother died when he was running dasha of Rahu/Jupiter.

From Sun

Lagna is occupied by Rahu and aspected by Venus. The Lagna is strong. The placement of Lagna lord Venus in seventh house and aspect of ninth and tenth lord Saturn constitute a Raj yoga in seventh house.

Mars and Mercury are the two marakas. Out of these two, Mars is a stronger since it is placed in 12th from Sun and is aspected by Jupiter, eighth lord from Sun. This powerful Mars is afflicting Moon. His father died when he was running dasha of M oon/M ars.

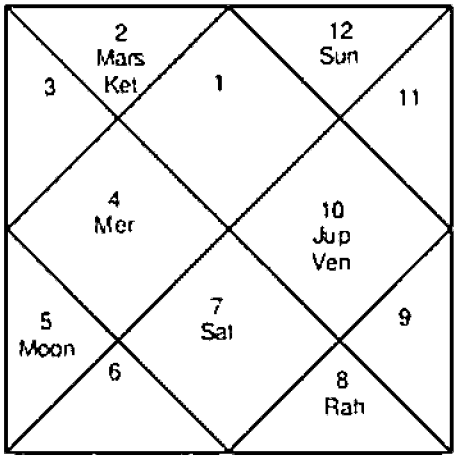

Example 7

Now wediscuss the cyclical dwadashamsha chart of the example 4 of this chapter.

Lagna is aspected by exalted Saturn. Sun, M ars, Ketu are on both sides of Lagna causing papa kartari. There is no benefic aspect on the Lagna. The Lagna is fully spoiled.

From M oon

The Lagna is Leo and is aspected by Yog karaka M ars. There is no

other aspect on Lagna. The Moon Lagna is strong. The tenth house from Moon has Mars and Ketu. Jupiter is the fifth lord and aspects tenth house rendering it strong. Jupiter is eighth lord also from Moon.

From Sun

Sun is not conjoined or aspected by any planet. Eighth house from Sun is occupied by exalted Saturn. The eighth lord from Sun is placed in eleventh house from Sun with Jupiter and aspected by Mercury. These combination should promise long life to father.

The Parashar dwadashamsha is seen for status, longevity of parents and the lineage in the family. The cyclical dwadashamsha is for physical and material well being of parents.
